OLIN BUSINESS SCHOOL | FALL 2012
Being innovative, forward thinking, and proactive were part of Robert Brookings’ vision for the university’s new business school 95 years ago.

He was, after all, an entrepreneur who transformed the Cupples Woodenware Co. from a regional to a national concern and created the first regional depot-warehouse that revolutionized merchandise delivery along the railroads and rivers. As a successful businessman and a visionary change agent, he saw the need for a school to research and promote best business practices in the St. Louis region and beyond. Settling for business as usual was not an option for him.

I like to think Mr. Brookings would be pleased with the way his vision has evolved. Nearly a century on, Olin is one of the top business schools in the world, where faculty and students are challenged to think critically and globally to solve today’s complex management issues. And our partnership with another Brookings legacy, the Brookings Institution in Washington, DC, is helping to inspire and transform the business of governance through executive education for federal employees.

Our alumni, too, follow in the footsteps of Mr. Brookings. Never satisfied with the status quo, they are change agents for the 21st century. From biotech to building a library in sub-Saharan Africa, these Olin graduates don’t practice business as usual. Six alumni share their inspiring work beginning on page 10.

Without the original foresight and philanthropic generosity of Robert Brookings, Washington University would not be the internationally respected research institution it is today. Joanne and Chuck Knight and Carol and George Bauer carry on that tradition by leading the way with their generous gifts so that we may continue to strengthen Olin for its second century.

We are all part of this proud tradition that is Olin. We owe it to our founders as well as generations of alums and friends since our beginning to always strive for excellence and integrity in all we do and never settle for business as usual.

Mahendra Gupta
Dean and Geraldine J. & Robert L. Virgil Professor of Accounting & Management
dean@olin.wustl.edu
Olin launched a major expansion project on May 7, 2012, with the official groundbreaking ceremony for Knight Hall and Bauer Hall. When complete in the spring of 2014, the facilities will nearly double the business school’s footprint on the Danforth Campus.

The $90 million project includes two innovative buildings, united by a soaring glass atrium totaling 175,000 square feet. Lead gifts totaling $25 million from two of Washington University’s most dedicated benefactors—$15 million from Charles F. and Joanne Knight, and $10 million from George and Carol Bauer through the Bauer Foundation—provided the capital foundation for building Olin’s second century of top-ranked business education.

Located directly across Mudd Field from Simon Hall and adjacent to The Charles F. Knight Executive Education & Conference Center, the new ensemble of buildings will provide much-needed classroom, office, and meeting room space for the entire Olin community.

An amphitheater-styled Forum will be at the center of the five-story complex and accommodate gatherings from small and informal to all-school events. The new buildings will also include:

- 300-seat Emerson Auditorium
- 120-seat café in the Atrium
- Expanded Weston Career Center facilities for recruiters, advisors, and students
- 2,800 sq. ft. Active Learning Lab
- 75 faculty offices
- 18 group study rooms
- 11 classrooms

Registered with certification goal of LEED–NC v2009 GOLD
KNIGHTS AND BAUERS HONORED

The Knights and the Bauers received the Dean’s Medal this year for their significant dedication and service to Olin. Dean Mahendra Gupta presented the award at the Distinguished Alumni Dinner in April.

“The Dean’s Medal is awarded to special friends whose dedication and service to Olin Business School have been exceptional. By providing wise advice, pursuing high objectives, as well as inspiring the enthusiasm and support of many others, these friends have made significant differences to the school. Special friends of this caliber greatly enhance the school’s progress.”

TOP RIGHT: Chancellor Mark Wrighton, Stephen Brauer, chairman of the Board of Trustees, and Dean Mahendra Gupta dig in with Joanne and Chuck Knight at the May Groundbreaking ceremony.

RIGHT: Carol and George Bauer admire the artist’s rendering of Bauer Hall presented to them at the Groundbreaking festivities.

TAKE AN ONLINE TOUR

Take an animated video tour of the new buildings, watch live streaming webcams from the construction site, and keep track of the progress online as we build toward Olin’s second century by visiting our new website buildolin.wustl.edu.

CAMPUS-LEVEL ATRIUM

FORUM WITH VIEW LOOKING UP TO ATRIUM
The number of women enrolled in Olin’s MBA program jumped from 24% last year to 34% this fall, one of the highest percentages in school history.*

Members of the MBA Class of 2013 worked closely with the admissions team to boost female recruitment. Women leaders in the Class of 2013 also have reinvigorated and re-named their student organization. The new Olin Women in Business (OWIB) board, under the leadership of Zoe Hillemeyer, MBA ’13, is launching several new initiatives:

• Women at the Table (WATT), an inter-generational mentoring and networking series of meetings
• Résumé and career coaching that targets women
• Speakers series featuring alumnae in leadership positions
• Cross-gender orientation program with training similar to the cross-cultural sessions conducted with international students

To learn more about OWIB events or to contact board members, visit their website: olinwustl.campusgroups.com/owib/about/

*Women made up 35.5% of the full-time 2010–2011 classes entering the top 10 MBA programs in the U.S. according to Bloomberg Businessweek.
A month after graduation, the world-famous Harlem Globetrotters drafted Dylan Richter, BSBA ‘12.

“I was definitely shocked when I heard I was drafted,” Richter told Bear Sports. “Even though I interned with them during the second semester of school last year, it’s not something we talked about.”

Two weeks after the draft, the Globetrotters made Richter another offer: the position of digital marketing director. With a major in marketing and a minor in psychology, Richter accepted. “After finishing the season this past year, my only goal was to stay involved in basketball in some capacity,” he said.

During his career with the Washington University Bears basketball team, Richter scored more than a 1,000 points. He earned the 2012 University Athletic Association (UAA) Player of the Year—only the ninth player in school history to do so.

Adam Putterman, BSBA ‘13, majoring in economics and strategy and organizational behavior, enters his senior season ranked seventh in school history in singles wins (66) and ninth in overall victories (111).

Hannah Buck, BSBA ‘13, majoring in marketing, enters her senior season ranked first in school history in scoring average (79.16) and wins (nine). Last season, she ranked third in the region and 12th in Division III with a 77.29 scoring average.

Zane Turpin, BSBA ‘15, majoring in business administration, broke the 1,000 freestyle school record during his All-America swim in the 1,650 freestyle at the 2012 NCAA Championships.

Student-Athletes Score

Time Out from Global Studies

Undergrads on the London internship program were treated to a tour and soccer match at Manchester United’s Old Trafford stadium. Avram Glazer, BSBA ’82, co-chairman of the team franchise, invited the students, and the football club’s COO Michael Bolingbroke (pictured) was their host. New study abroad programs launching this year include: internship semesters in New York and Sao Paulo, Asian Capital Markets Study Tour to Hong Kong, Israel Summer Business Academy, and the return of the Luxury Goods European Tour. New programs in Singapore, Sydney, and Israel will be offered again due to their success and popularity in 2011–2012.
The Trillion-Dollar R&D Fix
May 2012

“A new metric for R&D productivity—which I call RQ, short for research quotient—allows you to estimate the effectiveness of your R&D investment relative to the competition and to see how changes in your R&D expenditure affect the bottom line and, most important, your company’s market value.”

Article by Anne Marie Knott, professor of strategy, was also translated and published in HBR China June edition.

Bloomberg Businessweek
Skirting the Issues: Evidence of Gender Bias in IPO Prospectus Evaluations
May 11, 2012

“The researchers concluded that there’s an apparent reluctance to invest in IPOs headed by females even though nearly half of all privately held businesses are either owned or led by women.”

New research by Judi McLean Parks, Reuben C. & Anne Carpenter Taylor Professor of Organizational Behavior, and co-authors, finds gender bias in the investment sector.

Israel’s Startup Nation
Jan. 15, 2012

“A lot of people think the business world is heartless, it’s only after the money. But meeting with venture capital firms here in Israel [Pitango and Gemini] showed me it’s about ideas, it’s about people-to-people and passion.”

Missi Jacobson, MSW ’12, student in Olin’s Venture Consulting Course, interviewed during a class tour of Israel on IDC-Herzliya’s radio program.

Time
The Real Reason Women Don’t Help Other Women at Work
May 11, 2012

“When you’re one of just a small handful of women in a working environment, the study shows, you’re more likely to be compared with other women. One of you is the ‘good one,’ one of you is the ‘bad one,’ so to speak. And while you’d think that’d be incentive enough to create a female community in the workplace, Duguid found that few women want to be the first to take the plunge.”

Read more about this research by Michelle Duguid, assistant professor of organizational behavior, in Olin Praxis pullout section on page 19.

Psychology of Fraud: Why Good People Do Bad Things
May 1, 2012

“Somewhere between 20 percent and 50 percent of cars that should fail [emissions tests] are passed—are illicitly passed .... And most people don’t see the harm in this,” says Pierce. “That is the problem.”

Lamar Pierce, associate professor of strategy, shares findings from his research about unethical behavior. See more of his research in Olin Praxis pullout section on page 19.

Got a Business Idea? Good, Now Get Out of the Way
June 8, 2012

“When you feel an idea is yours, you are very selective about adopting others’ suggestions for change,” said Markus Baer, an associate professor of organizational behavior at Olin Business School at Washington University. “While you may not mind others adding to your idea, when they take things away from it, you get very upset.”

New Faculty

LINDA BUHR
Adjunct Lecturer in Communications
PhD, Education, 1997, Saint Louis University
Linda Buhr joins Olin with both domestic and international work experience, including working with the 2000 Sydney Olympic Committee. Previously, she was an assistant professor of business administration at Fontbonne University.

JARED JENNINGS
Assistant Professor of Accounting
PhD, Accounting, 2012, University of Washington
Jared Jennings joins the accounting area of Olin after working as a teaching assistant at Foster School of Business at the University of Washington. Prior to that, he was a senior audit associate at Deloitte & Touche LLP. His research interests include litigation, regulation, and financial reporting.

THOMAS MAURER
Assistant Professor of Finance
PhD, Finance, 2012, The London School of Economics
Previously, Thomas Maurer was a graduate teaching assistant at The London School of Economics. His research interests include asset pricing, optimal portfolio choice, long run-risk, demographic change and uncertainty in finance, and learning in financial markets.

NGOC-KHANH TRAN
Assistant Professor of Finance
PhD, Financial Economics, 2012, Massachusetts Institute of Technology
PhD, Physics, 2005, University of Virginia
Ngoc-Khanh Tran comes to Olin from the Sloan School of Management at the Massachusetts Institute of Technology, where he was a teaching assistant in the finance group. His research interests include asset pricing, international finance, and investments.

ELIZABETH PETRE
Postdoctoral Lecturer in Communications
PhD, Speech Communication, 2011, Southern Illinois University–Carbondale
Prior to joining Olin, Elizabeth Petre was on the faculty of Bloomsburg University of Pennsylvania in the Department of Communication Studies. Her courses at Olin will promote effective writing, presentation, and critical-thinking skills to assist students in their personal and professional lives.

JAMES SAWHILL
Visiting Assistant Professor of Marketing
PhD, Marketing, 2010, University of California, Berkeley
James Sawhill was previously on the faculty at Rutgers Business School in the supply chain management and marketing science department. His research interests include marketing and public policy, behavioral economics, social networking, and mobile device marketing.

Olin’s Thinking Honored

Critical Thinking@Olin—a unique approach to identifying and solving problems introduced to students during orientation and used throughout the curriculum—has received the inaugural Innovator Award from the MBA Roundtable. The award was created to recognize and promote innovative curricular initiatives in MBA education and to acknowledge the institutions that are driving change in the field. Professor Jackson Nickerson, who has been instrumental in the development of Critical Thinking@Olin, has hosted two webinars on the initiative for peer institutions.

New in Simon Hall

New custom-made wallpaper and displays in Simon Hall welcomed back students in September with updates on the new OlinCareers website (olincareers.wustl.edu), the new Olin blog, and construction of Knight Hall and Bauer Hall. New photos of life at Olin have also been installed throughout Simon Hall.
**Toasting 10 Years in Shanghai**

Two days of festivities marked the 10th anniversary of Washington University’s Executive MBA program with Fudan University in China. From left to right: Chancellor Mark Wrighton, Fudan School of Management Dean Xiongwen LU, Dean Gupta, Professor Jim Little, and Julia LI, co-director of the Washington University-Fudan EMBA program congratulated the graduates and hundreds of alumni who attended.

---

**Women’s Leadership Forum Debuts**

A new executive education program designed by and created for businesswomen who want to hone their leadership skills earned high marks from its first participants and will be offered again beginning in November.

The Women’s Leadership Forum Certificate Program features guest speakers and Washington University faculty in a lecture and discussion format that takes a deep dive into topics such as negotiation strategies, managing conflict, building alliances, and power and politics in the workplace.

For more information on executive education at Olin, go to [olin.wustl.edu/executiveeducation](http://olin.wustl.edu/executiveeducation)

---

**Can You Whistle the Wash U Alma Mater?**

You’re not alone. Most students only hear the song, composed in 1908 and set to a traditional German tune, at Freshman Convocation and Commencement.

Thanks to an Olin student with a passion for electronic music, Graham Chapel’s bell tower is now chiming the university’s Alma Mater weekdays at noon.

“I didn’t even know we had an Alma Mater song, so it was definitely cool to learn and record it,” says Michael Feinstein, BSBA ’13, who was recruited to create an electronic version of the music.

Michael Byrne, A&S ‘15, initiated the project to promote the tune.

“The chapel doesn’t have real bells,” explains Feinstein, who is majoring in healthcare management. “I initially produced a much more elaborate version, but the school wanted it to sound like a traditional carillon. So, I found a sampled bell sound that I had in my library to finish it off.”

If you can’t make it to campus to hear the Graham Chapel chimes, listen to his versions of the Alma Mater on his website: [tunedlogic.com](http://tunedlogic.com)

Feinstein, a native of Villanova, Pennsylvania, was a second-year intern at a mid-sized pharmacy benefits manager in Philadelphia this past summer. “Music is more of a passion than a hobby for me,” he says.
Is Innovative Government an Oxymoron?

Q&A with Darrell M. West, vice president and director of Governance Studies and founding director of the Center for Technology Innovation at the Brookings Institution.

Business has used information technology to improve productivity and get more efficient. The public sector needs to learn what private sector solutions can work in government and move quickly to adopt those innovations. This includes improvements in communication, collaboration, and decision-making. We need to bring the government into the 21st century.

Government agencies such as the Transportation Safety Administration are using blogs and social media to learn about citizen complaints and figure out where its officers need to do a better job. This agency compares complaints at various airports to determine where there are the greatest problems and what they need to address to improve the traveler’s experience.

Administrators need to become more entrepreneurial and think about ways they can change information and organizational processes to improve service delivery. Government leaders need to work with mid-level bureaucrats to figure out where the choke-holds are on decision making and the best ways to break those logjams.
Alumni challenge the status quo

BE THE CHANGE YOU WISH TO SEE IN THE WORLD

From bumper stickers to dorm room posters, those 10 familiar words, attributed to M.K. Gandhi, may be a cliché to some. To others, they are a mantra, an inspiration, and a definition of leadership. The Olin alumni profiled on the next few pages were driven by career, personal history, and passion to be that change.

Of the six alumni you are about to meet, two are at the very beginning of their careers as change agents. The others are at various stages ranging from six to 25 years out of graduate school. They work in very different fields—from education (building the first library in an African village) to environmental sustainability (converting AT&T’s worldwide fleet to alternative fuel vehicles), but they share the same goal: creating and inspiring change for a better world.

Are you a change agent? Share your story on Facebook or via email: olinbusiness.wustl.edu.

By Shera Dalin

WORK: Yao Amekor, a native of Bakpa-Avedo, Ghana, and his former Olin classmate John Rogers, a native of Tupelo, Mississippi, founded Amekor Foundation in 2010 to improve the education system in Ghana. This year, Amekor resigned as plant accounting manager for Procter & Gamble in St. Louis to return to Ghana to build a library in his village. Growing up without running water, electricity, or a decent school, Amekor knows firsthand the struggles of his fellow Ghanians. He vowed to build the library to help educate poor rural children in Bakpa-Avedo.

“I believe it is deplorable that of the countless students who have passed through my school since its establishment in 1969, I remain the single most successful student.”
Clearly, this is a disaster of great magnitude. My prayer and hard work is geared toward improving the fortunes of the school so that the lives of so many students can be transformed even better than my life," Amekor says.

Rogers was inspired by Amekor’s dream. After graduating from Olin, Rogers did a stint at a nonprofit in Cambodia, then returned to St. Louis to help found Amekor’s foundation. "In that one decision I bet everything I had that Yao and I could do more together than either of us could working for someone else," Rogers says.

Together, they have raised $20,000 to establish the Amekor Foundation, brought in teachers to help the understaffed schools, and started building the library this summer. They are raising an additional $40,000 over the next year to complete the library. It will be used by an estimated 2,000 children throughout the region, which Amekor believes has no other library. It will also be a free, lighted place to study in a village without electricity. "This library will be an awesome resource for the entire Avedo area. Our plan is to staff the library with tutors who’ll help students in basic literacy while providing tutoring help for students after school. This library will be the engine of the transformation machine we are building at Bakpa-Avedo," Amekor says. His work has already inspired entrepreneurs in another village to raise funds for their own library.

WHAT PEOPLE SAY: “Yao and John are amazing young people, and I believe they will change Ghana during their lifetime. As recipients of an MBA from Washington University, they are already making their mark,” says Amekor’s mentor Carl Trautman, SCORE counselor and Amekor board member.

“But suddenly, I realized those same passions combined with my education from Olin made the idea of starting my own business in a different continent achievable.”

John Rogers

OLIN INSPIRATION: “The greatest gift I received from Olin came from the culmination of my work in The Hatchery course taught through the Skandalaris Center for Entrepreneurial Studies,” Rogers says. “I entered Olin planning to return to work in the nonprofit sector. But suddenly, I realized those same passions combined with my education from Olin made the idea of starting my own business on a different continent achievable.”

Rogers and Amekor also applied their Olin knowledge to the launch of Intongu Ltd., a haulage, importing, and construction supply business in Ghana that supports their living expenses and the foundation. Intongu has been successful, and is helping to build roads, hospitals, and other infrastructure in Ghana.

LOCATION: AVEDO Tribal region in Ghana

LEFT: Rogers (far left) and Amekor (far right) pause with fellow workers on the construction site of their library in Ghana.
Dugan manages AT&T’s initiative to deploy 15,000 alternative fuel vehicles in its fleet by 2018. That includes about 7,000 hybrid electric vehicles and up to 8,000 compressed natural gas vehicles, or CNGs. Under her leadership for the past four years, the program is on track to meet its goal. Dugan’s colossal undertaking has attracted national attention and led to a meeting with President Barack Obama to discuss her innovative program.

Converting a substantial portion of AT&T’s 70,300-vehicle fleet, one of the largest in the nation, to cleaner-burning fuels can reduce carbon emissions by up to 25 percent for CNG vehicles alone. According to the Center for Automotive Research, the initiative will have a tremendously beneficial impact on the environment. During the first decade of AT&T’s plan, it will:

- reduce greenhouse gas emissions by 211,000 metric tons
- eliminate the purchase and consumption of 49 million gallons of gasoline/diesel

If you do the math, that’s equivalent to removing 38,600 vehicles from the road per year.

“Every day, I have an opportunity to make a difference.”

Dugan’s efforts also help the company and the United States rely less on oil imports, strengthen the U.S. natural gas industry, and set the standard for others to follow. Next, Dugan has her eye on hydrogen fuel cell vehicles.

“It’s easy to see that there is a wealth of opportunity to adapt from business as usual to new ways of operating that truly allow us to become part of the solution in encouraging a cleaner future,” she says.

“What people say:”

“Katie’s focused leadership, innovation, and collaboration skills have allowed her to catapult the company’s Alternative Fuel Vehicle (AFV) program from obscurity to being recognized as one of the best fleet sustainability programs in the nation. She’s been so successful with elevating the company’s AFV program to one of the best in the industry,” says Jerome Webber, vice president of global fleet operations for AT&T.

“Social responsibility is in my blood, and Olin offered me the opportunity to develop an acumen that enhanced my business skills while providing a bridge between my past (as an AmeriCorps teacher) and future. I was truly able to connect what I was learning in the classroom to my previous experiences and guide my job search to service-oriented companies where people and communities would be central to my work,” Dugan says. “I love my job. Every day, I have an opportunity to make a difference.”
**CHANGE AGENT:**

**Ken Allman**

**WORK:** While working as a physician recruiter, Allman started the nation’s first online physician job board from his apartment in St. Louis in 1987. That was before most people had heard of the Internet. When the web went mainstream, Allman morphed his job board into the Match.com of the medical community. Today, 20,000 physicians and medical specialists use the PracticeLink.com site to connect with some 5,000 hospitals. And Allman continues to innovate. As an early technology adopter, he began posting videos on PracticeLink for hospitals and clinics seeking physicians as many as 10 years ago—well before the YouTube revolution.

“Since the beginning, PracticeLink has been easy to work with, and changes come regularly to keep up with the available technology,” says Donna Loy, staffing development director, St. Joseph Medical Center in Reading, Pennsylvania.

**IMPACT:** PracticeLink is the dominant player in online physician recruitment, bringing the industry into the Internet age and publishing a national 80,000-circulation magazine on the topic. But its impact in Allman’s native Hinton, West Virginia, population 3,000, is perhaps more visible. The 130-year-old former railroad town welcomed PracticeLink’s headquarters and the 40 jobs it created. But other businesses Allman started have truly transformed the town.

“A vintage postcard from Allman’s hometown, Hinton, West Virginia

Allman and his team have renovated 10 buildings over two and half blocks, including a gut rehab of a historic movie theater that is now a conference center during the week and a cinema on the weekend, a historic home converted into an executive suite bed-and-breakfast, a century-old hotel, a gourmet bistro/gift shop, and an AM radio station. Encouraged by the development, entrepreneurs, musicians, and artists are hanging out their shingles in downtown Hinton.

“Since the beginning, PracticeLink has enabled us to spark renewed hope that a 100-year-old railroad town can reinvent itself,” Allman says. “What starts out to be a little change can make a big difference.”

**WHAT PEOPLE SAY:**

“Hinton was beginning to deteriorate rapidly once the railroad moved out,” Summers County Chamber of Commerce president Mary Haley recalls. “We lost all of our family shopping areas, and the storefronts were becoming empty. But Ken sparked a revival of downtown by renovating basically two blocks. Now we have a much more active downtown. Ken is the spark plug.”

“WHAT PEOPLE SAY:

“Hinton was beginning to deteriorate rapidly once the railroad moved out,” Summers County Chamber of Commerce president Mary Haley recalls. “We lost all of our family shopping areas, and the storefronts were becoming empty. But Ken sparked a revival of downtown by renovating basically two blocks. Now we have a much more active downtown. Ken is the spark plug.”

**OLIN INSPIRATION:** “One of the biggest benefits of the Executive MBA program was that it really helped me understand working with and collaborating with other people,” Allman says. “That whole dynamic was extremely instrumental in my life and has made a significant impact in how I am able to accomplish these things.”

“OLIN INSPIRATION:

“One of the biggest benefits of the Executive MBA program was that it really helped me understand working with and collaborating with other people,” Allman says. “That whole dynamic was extremely instrumental in my life and has made a significant impact in how I am able to accomplish these things.”

**“What starts out to be a little change can make a big difference.”**
Nidus Partners, conceptualized and co-founded by Gonzalez, searches for cutting-edge technology nationwide. It creates companies around the most promising innovations, then manages the startups to commercialize or license the technology. The for-profit is a unique model nationally because it invests up to $200,000 in the startups from funds contributed by supporting larger companies, such as Monsanto and Bunge North America. In return, the supporting firms get detailed information about technology that could help or affect their own business.

Under the leadership of Gonzalez, Nidus has created seven companies with technologies ranging from the next-generation lithium battery cathode to one that converts sulfur dioxide into natural gas. Gonzalez is a former engineer with DuPont and Monsanto who led a management buyout of her division from Monsanto. She tapped her entrepreneurial history for special insight in forming this unique partnership of researchers, corporate funders, and fellow entrepreneur team members. In just two years, Nidus has attracted 10 entrepreneurs in residence to its center, has raised nearly $2 million in capital and grants, and is helping to train a cadre of community college graduates to work in biotechnology.

“This is a really novel approach. It’s a combination of going to the corporations for funding and engaging their technology leadership and helping to vet and de-risk those technologies. It’s a remarkable process. What Vicki is doing is creating a whole new corps of entrepreneurs,” says Tom Melzer, former president of the Federal Reserve Bank of St. Louis and managing partner of RiverVest Venture Partners.

“What impacted me the most was the organizational development classes I took, especially with Professor [emeritus, Nicholas] Baloff. It’s because everything we do at Nidus is about people, whether it’s our corporate partners, entrepreneurs, my two business partners, or university relationships. It’s all about what motivates a person, what the politics of an organization are, and how you get alignment,” Gonzalez says.

Gonzalez posed among the corn experiments in the Plant Growth Facility at the Donald Danforth Plant Science Center located next door to Nidus’ office. She’s currently working with a new company that proposes converting the entire corn plant—from stem to tassle—into biofuel. The Jack C. Taylor Greenhouse, pictured here, is one of 28 at the Center.
“Every morning when I get up and come to work, I’m doing something good.”

In 2003, after many years in the corporate and education worlds, Aranda was named head of the organization that launched his own business career. The Consortium, founded by Washington University Professor Sterling Schoen at the height of the civil rights movement, provides merit-based full-tuition scholarships for minority students seeking MBAs at 17 top-ranked universities. Aranda, who became a Consortium fellow in 1985 and went on to work at Andersen Consulting and to form his own entertainment consulting firm, has dramatically expanded the number of minority MBA students who receive scholarships through The Consortium. Funding comes from 90 corporate partners who also actively recruit and hire the MBA graduates. “Every morning when I get up and come to work, I’m doing something good,” he notes.

Aranda has doubled the number of Consortium fellows to nearly 400 annually and the organization’s support to $25 million a year—strong accomplishments during the Great Recession. The end result is that The Consortium is helping a record number of African Americans, Hispanics, Native Americans, and women earn MBAs and diversify the ranks of American business managers. Diverse management, in turn, will help U.S. companies broaden their employee rolls to reflect minority percentages in the general population. On a personal level, Aranda hopes increased diversity and inclusion in the workplace will eventually eliminate the type of race-based insults he endured as a young man of mixed ethnic heritage.

“My fondest hope is that we reach our mission and we are no longer needed,” Aranda says.

“Sometimes Peter is a little before his time. Changes in attitudes among the schools and corporate partners eventually catch up. Then his ‘old ideas’ become new and exciting plans for the future. His calm, steady style and his insatiable thirst for learning and growing make him an outstanding visionary for diversity and inclusiveness in higher education and the American corporate world,” says Phil Miller, assistant dean at the Wisconsin School of Business at the University of Wisconsin–Madison.

“Everything I learned at Olin, I use. It was a great MBA program, and the core curriculum and process orientation were incredibly helpful. The ability to network is something I still use today,” Aranda says.
Lewis and Clark paddled their way west more than 200 years ago. This summer Olin alumnus Bob Frick, BSCE ’60, MBA ’62, pedaled the 3,000-mile trail from Astoria, Oregon, to St. Louis. Frick, 75, and friend Len Holmes, 70, cycled halfway across the U.S. to raise awareness and donations for Habitat for Humanity in the East Bay/Silicon Valley. Frick’s first Cycle of Hope ride in 2008 traveled from San Diego to St. Augustine, Florida, and raised $90,000. This year’s trip is on track to double that amount. Frick retired after a 25-year career with Bank of America but remains active in developing affordable housing, teaching, and venture capital investing. He serves on the Washington University Board of Trustees, Olin National Council, and the Eliot Society.

Spry septuagenarians cycle 3,000 miles from Oregon to Missouri

Change. Why is it important?

If we are not modifying our path, moving forward, and evolving with the times, then we are destined to be mediocre if not non-existent.

I see this in my business, Priority Plastics, a manufacturer of plastic containers. If we don’t keep up with the times, then we will not be successful. Our competition will pass us by. The path is not easy, and it is not always clear. If success were easy, then there would be many more successful companies than there are today.

When I think of positive change, I think of Washington University. I graduated in 1997 from a 3-2 Engineering and MBA program. I accepted a position with Procter & Gamble and moved to Cincinnati. In 2001, I moved back to St. Louis to start a private equity firm and saw a very different Washington University. Not only did the number of buildings seem to increase exponentially, but also the student life and program offerings mirrored the physical growth. To me, this was an amazing achievement. It made me proud to be a Washington University alumnus.

Today, I am pleased to say that the growth and success of Washington University continues. The Olin Alumni Board is committed to building our school for the next century of alumni leaders. Did you know that more than 1,500 alumni and corporate friends volunteer their time each academic year at Olin? Did you know that you can give back your time and your talents to Olin regardless of your geographic location in the world? Did you know that we are breaking ground on two new facilities? (see page 2)

Washington University taught me how to navigate my way through the business and technological worlds. The university continues to inspire me with its commitment to be one of the top universities in the world. I am engaged, thrilled, and honored to be a part of our growth and success at Olin Business School.

I hope that you have an interest in connecting with or enhancing your connection with Olin. If so, please contact Steffani Lautenschlager with Olin’s Alumni & Development staff at 314-935-5872 or email Lautenschlager@wustl.edu. To ensure that you receive the latest news from Olin, please update your contact information on our website: www.olin.wustl.edu/alumni.
Over coffee in the Danforth University Center (better known as the DUC), Chuck Cook, MBA ’68, shares some school history that surprises a current student. “Entrepreneurship was not part of our vocabulary in 1968,” says Cook. “We all went to work for big companies.”

The student, Michael Gidding, MBA ’13, who is simultaneously earning an undergraduate and master’s degree in chemical engineering, is also an aspiring entrepreneur. He credits his relationship with Cook through the Olin “Industry Insider” Mentor Program as one of the reasons he’s won four business plan competitions this year. “In the competitions, you get asked lots of questions. Chuck has really helped me prepare and anticipate what they would ask,” Gidding says of his mentor. (read more about Gidding’s startup on page 26)

Cook retired from Ashland Specialty Chemical eight years ago and is now a management consultant in addition to his multiple volunteer activities at Olin and various St. Louis organizations. Cook was instrumental in establishing the mentor program seven years ago with fellow alumnus Burl Stamp, Jr., MBA ’87. The number of alumni and students participating doubled this past year to more than 100 pairs of mentors and mentees, according to Sean Martin, who coordinates the program for Olin’s office of Alumni & Development.

“The fundamental theme of the mentoring program is that it’s a risk-free sounding board for the students,” explains Cook. “We’re not involved in grading, we’re not involved in job interviews per se, there’s no downside, and it’s a place to ask anything that comes to mind without risk of any consequence whatsoever.”

Students and alumni are matched based on shared academic and career interests. “Relationships take a variety of paths,” Cook says based on his many years of mentoring. “It can be as simple as looking at a cover letter or to what has happened with Mike. It’s turned into a business mentoring relationship.”

Frankel says it’s important for students and alumni mentors to communicate frequently and work at getting the most out of the relationship. “As I was going through both undergrad and grad studies I had a lot of mentors who helped me identify what I wanted to do in my career and how to get my foot in the door,” Frankel recalls.

“I like to participate in the mentor program as a way of paying it forward and giving it back, similar to the way my mentors did for me.”

For more information on the Industry Insider Mentor Program, contact Sean_Martin@wustl.edu.
Distinguished Alumni 2012

Olin Business School recognized the achievements of four alumni during the annual Distinguished Alumni Awards Ceremony held April 5 at the Ritz Carlton, St. Louis.

Scott B. Helm  
BSBA ’87

Helm is a co-founder and partner at Energy Capital Partners, a New Jersey-based private equity firm focused on investing in North American energy infrastructure. The company has raised around $7 billion in equity funds over the past seven years. Its holdings include companies in electric power generation, renewable energy, electric transmission, gas storage and pipelines, and other energy assets.

Paul A. Koch  
BSBA ’61, JD ’64, MBA ’68

Koch is co-chairman of the board at Koch Development Co. Koch and his brother Roger Koch are the third generation in the real estate investment and development business and jointly own Koch Development Co. As principals and board members, he and Roger are responsible for the overall strategic direction of the company. Koch has more than 50 years of entrepreneurial experience in real estate. The Koch brothers are both experienced in land development, as well as real estate investment, construction, and management. Their experience encompasses residential, office, retail, and industrial real estate, and real estate brokerage.

Roger L. Koch  
BSBA ’64, MBA ’66

With his brother Paul, Koch is co-chairman of the board at Koch Development Co. In addition to his work in Koch Development Co., Roger Koch was the majority owner and controlled numerous partnerships outside the family business investing in properties in Missouri, Minnesota, Michigan, and Illinois. He is a National Association of Securities Dealers licensed broker and dealer for direct participation programs, licensed insurance broker, and licensed real estate broker. He has handled the sale, acquisition, and financing of numerous properties for Koch Development Co. and its affiliates. Koch served as chairman of the board of Mark Twain South County Bank for 16 years and was a member of the Mark Twain St. Louis Bank board.

Merry L. Mosbacher  
MBA ’82

Mosbacher is principal of the insurance marketing department at Edward Jones. She leads the firm’s efforts to market and distribute insurance and annuity products, which account for some $8 billion in annual sales and 18 percent of the firm’s overall trade revenue. She began her career at Edward Jones as a student intern while working on her MBA at Olin. She joined the company’s investment banking department full time in 1982 and was named a principal four years later where she was responsible for more than 60 public offerings. In 1994, she assumed responsibility for the insurance marketing department.

The Distinguished Alumni Awards honor Olin Business School alumni who have attained distinction in their careers. Those being honored share the characteristics of leadership: progressive thinking, high standards, uncompromising integrity, commitment, courage, and confidence. Their careers serve as models for all Washington University students and alumni.
BY THE NUMBERS

50 PERCENT
more than half of the wood products in Knight Hall and Bauer Hall will come from sustainably managed forests.

3,900 applications for fall 2012 BSBA class.

6.45 average years of work experience for Olin Professional MBA students.

1492 Average SAT score for class of 2016 freshmen.

Olin Executive MBA worldwide ranking in teaching by Poetsandquants.com, tied with Harvard.

#7 Master of Science in Finance Program ranking in the U.S. by the Financial Times.

37% percentage of Executive MBA Class 40 that is female (National average = 23% for EMBA programs).

$95,000 median salary, MBA Class of 2012.

$100,000 Executive MBA Class 37 Gift to Annual Fund.

1,753 Interviews arranged by the Weston Career Center in 2011–2012.

4,000+ YouTube hits for the animated fly-through video of Knight Hall and Bauer Hall.

22 local and regional nonprofits that participated in the Taylor Consulting Program.

6,305 alumni donors.

EXECUTIVE MBA CLASS 37 GIFT TO ANNUAL FUND.

CREATE KNOWLEDGE. INSPIRE INDIVIDUALS. TRANSFORM BUSINESS.
Olin Hosts Hundreds of Speakers

During the past academic year, the Olin community hosted 300 guest speakers and 125 corporate mentors on campus. These visitors bring real-world perspectives and experiences to students inside and outside the classroom. Pictured here are a few of the distinguished executives who were seen and heard at Olin.

John Doerr
Doerr and his VC partners at Kleiner Perkins Caufield & Byers have backed some of the most successful ventures in the internet age from Amazon to Zynga. He shared insights and advice with students during a recent visit to Olin.

Mary Jo Gorman, M.D.
EMBA ’96 and CEO of Advanced ICU Care, Gorman was a featured speaker in the “Lessons Learned as a Leader” series for Executive MBA students.

Cheryl Polk
EMBA ’09 and executive vice president, chief operating officer, and chief of strategy & engagement United Way St. Louis. Polk was a panelist for the Women’s Leadership Forum and shared her expertise with several programs and student clubs.

Sara Wade
EMBA ’07 and senior vice president and chief human resources officer at Express Scripts, Wade delivered the May 2012 Commencement speech for the Executive MBA program.

Jerry Kent
BSBA ’78, MBA ’79, Kent told the BSBA graduating class of 2012 that the three most important words in business are, “I need help.” The chairman and CEO of Suddenlink Communications and CEO of Cequel III said, “It’s not a sign of weakness. It shows that you’re smart enough to recognize you’re in a position to fail and you want to turn that moment into a success.” Kent said his mentor and business partner Howard Wood, BSBA ’61, taught him that lesson.

Walter Robb
Co-CEO Whole Foods, Robb spoke at the Century Club Business Series and spent time discussing the food business and sustainability with student groups during his visit in February.

“Defining Moments: Lessons in Leadership and Character from the Top” is a new course that challenges experienced CEOs and students to closely examine the essence of good leadership.

“We asked six leaders to discuss key points in their careers that shaped the trajectory of their leadership and character, and particularly those that involved their own moral compass,” says Kurt Dirks, PhD, Senior Associate Dean–Programs, Bank of America Professor of Managerial Leadership, and co-teacher of the course.

“We wanted students to appreciate the role and importance of values in leadership by exposing them to standout CEOs who achieve excellence while pursuing deeply held values,” says Stuart Bunderson, PhD, the George & Carol Bauer Professor of Organizational Ethics & Governance, co-teacher of the course.

As a final assignment, students were asked to reflect on how they plan to pursue their own path of leadership in ways that reflect excellence and character. Excerpts are quoted here with the students’ permission.

“Dave Steward’s presentation left me with some important takeaways: an emphasis on long-term vision, the importance of relationships, and faith as a foundation of strength.”

“Eric Greitens’ philosophy of leadership centers around the tireless pursuit of personal purpose through the development of character.”

“Dave Senay’s leadership style is predicated on the notion of community. He spoke about the need to rely on team members to provide advice on issues. He listens to people, understands their needs, and makes a decision once he feels he has all the information.”

“Andrew Taylor reminded me of the importance of staying true to my core values.”

“Bob Chapman inspired me to work for a company that understands its future is not only dependent on its business model but also its culture.”

“If choices define you, as Jim Weddle claims, we must always be cognizant of the options that lie in front of us.”

Navigating the Brave New World of Social Media

A candid conversation about the transformation of marketing

In less than a decade, Facebook, Twitter, and an entire new genus of Internet-based communication tools provided fertile new areas for research as a powerful voice that Madison Avenue cannot ignore. At Olin, social media is a component of every marketing class and social media has helped democratic movements topple dictators and shaken the foundations of traditional marketing. And it continues to evolve.

To discuss the social media revolution and its effect on traditional marketing, we brought together a researcher, a recent MBA graduate, and a consultant.

REIMER: Social media is radically changing the relationship between companies and consumers. How do you see the dynamic shifting?

ZAYDMAN: I think the challenge for companies is understanding how to engage in social media. They want to talk to consumers but they have to be ready when consumers talk back. It is a dialogue.

SEETHARAMAN: There are two interesting connections between consumers and brands in the social media arena. One, the consumer is managing the brand just as much as the brand manager. And the second thing is the crowd sourcing phenomenon. It is the classic example of consumers playing a central role in the strategic decision-making of the organization.

SEETHARAMAN: Think about Facebook. They are sitting on a gold mine of information that includes demographic, psychographics, and even behavioral metrics. That information provides the ability to target specific consumers, which in my opinion should become the mainstay of the revenue model moving forward. They eventually will figure out a way to sell that targeting ability to clients in a profitable way, and that’s the exciting part of the Facebook model because we have never had a chance to understand individuals in this many dimensions.

SEETHARAMAN: Think about Facebook. They are sitting on a gold mine of information that includes demographic, psychographics, and even behavioral metrics. That information provides the ability to target specific consumers.

SEETHARAMAN: Thank you. I think the example of consumers managing the brand is really interesting. And it’s not just companies that are managing the brand. It’s the consumers themselves.

REIMER: How can we measure the success of social media?

SEETHARAMAN: Using IP addresses you can track consumers from when they view a display ad to an actual click on the ad, and trace their clicks all the way down to the actual behavior you’re trying to influence, such as making a purchase, answering a survey, or simply liking your website. This is an exciting area of research that many academics, including myself, are getting involved in, and I think it will find its way into practice.

SEETHARAMAN: Thank you. I think the example of consumers managing the brand is really interesting. And it’s not just companies that are managing the brand. It’s the consumers themselves.

REIMER: Are marketers taking advantage of all the consumer data that social media contains?

SEETHARAMAN: Social media is a powerful voice that Madison Avenue cannot ignore. At Olin, social media is a component of every marketing class and social media has helped democratic movements topple dictators and shaken the foundations of traditional marketing. And it continues to evolve.

SEETHARAMAN: Thank you. I think the example of consumers managing the brand is really interesting. And it’s not just companies that are managing the brand. It’s the consumers themselves.

REIMER: How can we measure the success of social media?

SEETHARAMAN: Using IP addresses you can track consumers from when they view a display ad to an actual click on the ad, and trace their clicks all the way down to the actual behavior you’re trying to influence, such as making a purchase, answering a survey, or simply liking your website. This is an exciting area of research that many academics, including myself, are getting involved in, and I think it will find its way into practice.

SEETHARAMAN: Thank you. I think the example of consumers managing the brand is really interesting. And it’s not just companies that are managing the brand. It’s the consumers themselves.
SEETHARAMAN: The short answer is yes ... almost. I think traditional advertising is becoming more irrelevant by the year with DVR technologies and so on. And with cognitive resources not just being limited, but being spent on so many things with the information explosion online, it’s going to be much harder to speak to the marketplace with traditional ads moving forward. So, organically, that’s going to happen. You need another way of entering the consumer’s brain, so to speak.

ZAYDMAN: It’s definitely a growing market, but I think a lot of companies are rethinking how they hire for social media. I think the default was, okay, you need social media, we don’t know what to do, let’s hire a young person because they’re familiar with Facebook and Twitter and YouTube and Klout, and I’m not. But I think that’s changing because ultimately, social media is a tool and you can learn it. Anyone can learn it. It’s ultimately a communication strategy.

SEETHARAMAN: These days, I think it’s becoming more relevant for pretty much any type of organization in any space. Social media will be the only game in town in the future. It’s here to stay.

REIMER: Do all organizations, from startups to global corporations, need a social media strategy?

REIMER: Do you think that social media could eventually replace traditional advertising?

REIMER: What’s the outlook for careers in social media?
SILICON PRAIRIE’S STARTUP BOOM HAS DEEP ROOTS AT OLIN

By Nancy Fowler

From gluten-free pizzas to wind energy devices, entrepreneurs emerging from Olin are part of a thriving startup community in St. Louis. Angel investors, VCs, and accelerator and incubator projects are offering unprecedented support to young startups. The combination of great ideas, talent, financing, and growth opportunities is elevating the status of St. Louis as an innovative center in the Midwest’s “Silicon Prairie.”

► Venture capital firms invested $139 million in the St. Louis metro area in 2011, nearly double the amount in 2010, according to Thomson Reuters.

► Kauffman Foundation ranks Missouri as the 6th best state for entrepreneurial activity (70% of the action is in St. Louis).

► Kiplinger places St. Louis among top 10 U.S. cities for startups.

► Newly formed Arch Grants awarded $750,000 to 15 startups—5 of them with ties to Olin.

► The Princeton Review ranks Washington University #5 among top 25 undergraduate entrepreneurship programs in the U.S.

CULTIVATION CAPITAL

Launched in April 2012, this new venture capital firm specializes in partnering with early-stage tech startups in Missouri. It invests $100,000 to $1 million in companies to help them continue rapid growth and prepare for an institutional round of financing.

Portfolio includes: aisle411; JBara software; Capital Innovators; LockerDome; Systematic Revenue (founded by Don Breckenridge Jr., BSBA ’95) and Yurbuds (founded by Seth Burgett, EMBA ’09)

cultivationcapital.com

Managed by a partnership of successful entrepreneurs including (from left to right) Olin’s senior lecturer in entrepreneurship Cliff Holekamp, MBA ’02; Rick Holton Jr., MBA ’04, co-manager of Holton Capital Group, a private equity firm; and Jim McKelvey Jr., AB & BSCS ’87, co-founder of Square, one of the fastest-growing technology companies in the U.S.

“We invest in young technology companies whose ideas have the potential to disrupt the way we live and work.”
The photos on these pages were taken at T-REx (TEC @ Railroad Exchange Building), a new low-cost, flexible-lease space for startups located in the former Famous-Barr headquarters in downtown St. Louis.
downtownrex.com

ARCH GRANTS
Arch Grants offers startups funding in the form of grants and supports them as they remain in or transition to downtown St. Louis. 15 companies were awarded a total of $750,000 in the first Arch Grants Business Plan Competition in spring 2012.
archgrants.org
Sarah Spear, Executive Director of Arch Grants

MED PREPS
No-cost and for-fee online practice exams, quizzes, and progress tracking for people preparing for medical board exams including MCAT, EMT, and massage therapist.
Preparing to launch Flux Education, an online study tool for elementary and high school students. Founded 2010.
Arch Grants winner 2012.
medpreps.com
Goal: Expand into non-medical exams, add mobile apps, contribute to the local startup culture, and recruit other WUSTL grads and students.
Jonathan Chen, BSBA ’08
Kenneth Kline, MSF ’08, BA Physics ’08 (not pictured)

IVERIA TV
Streams foreign-language TV (currently Georgian and Russian) to U.S. viewers. Founded 2011.
Arch Grants winner 2012.
iveria.tv/site
Goal: For Iveria to become the “Hulu of foreign TV”: “If any ex-pat in the world wants to watch TV from back home, we want them to think of our service.”
Sergi Turabelidze, BSBA ’08

“Olin taught me how to think for myself instead of simply following the crowd.”

Sarah Spear
Jonathan Chen
Sergi Turabelidze

The photos on these pages were taken at T-REx (TEC @ Railroad Exchange Building), a new low-cost, flexible-lease space for startups located in the former Famous-Barr headquarters in downtown St. Louis.
SATURNIS
Original plan for transforming biomass into liquid transportation fuels recently fell through in due diligence. Now, with Arch Grants sponsor Peabody Energy, Saturnis is evaluating possible pollution- and CO2-control solutions around coal. Founded 2011.

Arch Grants winner 2012. (plus three other competitions)

Goal: Gidding wants to benefit from this setback: “Unexpected problems are a hallmark of all entrepreneurial ventures. As long as I learn from the situation, and bring it into my next endeavor, it will be a success.”

Daniel Garcia, BS Chemical Engineering ’12 and Michael Gidding; MBA ’13; BS Chemical Engineering ’13; MS Energy, Environmental and Chemical Engineering ’13

TABLE TALK
TableTalk is a scaled-down, tablet-based service for small-to-medium-sized restaurants that can’t afford existing touchscreen methods for customers to alert waitstaff.

Founded Custom Technologies, an engineering and manufacturing tooling company in 1995; named part-time research Principal Investigator for Nidus partner AeroValve in 2012.

customtech-usa.com

A self-described “serial entrepreneur” of 20 years, Mell learned at Olin how to analyze markets, identify need, assess value propositions, and plan exit strategies.

Goal: Launch prototype of TableTalk in 2013.

Ellen Mell, MBA ’12/JD ’14

SYMBLIA
Online destination based on Craigslist concept connects students with classmates, club members, and teammates; and also offers marketplace for goods and services. Founded 2011.

symblia.com

Zipkin credits Olin with giving him “the confidence to pursue and create as opposed to theorizing and wishing.”

Goal: To expand beyond its current eight campuses which include WUSTL and Pratt Institute in New York City.

Jordan Zipkin, BSBA ’13

BOLD ORGANICS
Successfully marketing dairy- and gluten-free frozen pizzas. Available at Dierbergs in St. Louis, Whole Foods, Vitamin Cottage, Hannaford, Food Lion, Sweetbay, Albertsons and Roundy’s. Founded 2010 with assistance from St. Louis Chef Eric Brenner. bold-organics.com

Goal: Currently available in 1,600 stores nationwide. Plans to create more dairy- and gluten-free foods.

Greenwald says when Prof. Cliff Holekamp gave him a B– on his business plan, “it forced me to do significant additional research into the industry and revise it.” Holekamp is “impressed by, but not surprised by” Bold’s success. “It was always an A+ idea.”

Sasha Sherman, BSBA ’11; Aaron Greenwald, former Olin student; Justin Kniepman, MBA ’12

Seth Einbinder
Startups Vie for $200,000 in Annual Contests

Aspiring entrepreneurs enter Washington University’s two annual business plan competitions every year with ideas, enthusiasm, and hope. The 2012 Olin Cup commercial business plan competition awarded the $5,000 student prize to:

Ryan Rakestraw, MBA ’13. He was a member of the Freiezo LLC team, a company developing high-efficiency wind energy systems.

The 2012 YouthBridge Community Foundation award of $35,000 went to Sweet Sensation, a business that teaches North St. Louis teens about entrepreneurship and sustainability through beekeeping. Team members include Phil Minden, PMBA ’11, Leon Threat, MSW ’97, and Ernecia Coles, MSW ’96.

Go to Olin News at olin.wustl.edu/news to read about all the Olin Cup and YouthBridge SEIC winners.

JANJI
Named for the Malaysian word meaning “promise,” Janji manufactures running apparel featuring emblems of developing countries. Profits are donated to clean water projects and food programs in those countries. Founded 2012.

runjanji.com

Goal: To partner with projects in additional countries each year.

Burnstein credits The Hatchery for their good start: “We were challenged by sophisticated mentors who pointed out holes in our plans.”

Michael Burnstein, BA ’12, Urban Studies & minor in Entrepreneurship and David Spandorfer, BA ’11 International Business

SLEEVE A MESSAGE
Supplies custom-designed and printed cardboard sleeves for coffee cups to 100-plus clients including St. Louis’ Coffee Cartel, Los Angeles’ Handsome Coffee Roasters, and Bon Appétit catering. Founded 2010.

sleeveamessage.com

Goal: Developing a counter-top printer for clients to create their own customized coffee-sleeve advertising on demand at point of sale.

Dresner credits Olin’s Business Career Seminar for giving him confidence to pursue an idea that had been percolating in his head since the age of 10.

David Dresner, BSBA ’10

“Successful entrepreneurs learn to assess the weaknesses in their strategic plan.”

Ellen Mell
Cynthia Ross, MBA ’79, Evanston, IL, has been named executive director for the Chicago division of PROJECT C.U.R.E.

1980s Merrill Prager, BSBA ’80, Northbrook, IL, serves as equity chair of the Joseph Jefferson Awards Committee, which celebrates excellence in Chicago theater.

Richard Strauss, MBA ’86, Hong Kong, SAR China, was promoted to managing director of family office and institutions at Citi Private Bank.

Douglas Green, BSBA ’89, Chicago, IL, is the vice president of human resources at Merchandise Mart. douggreen99@yahoo.com

William Bates, BSBA ’71, Wildwood, MO, was promoted to CFO of Ophthalmic Surgical Instrument, a design, manufacturing, and international sales company. bill.bates@katalysurgical.com

Howard Birnberg, MBA ’74, Carmel, CA, received the 2011 Irwin Award from the Book Publicists of Southern California for best international marketing program for his novel The Genius Gene published by Book Guild Publishing.

Jonathan Settle, MBA ’76, Harwood, MD, was promoted to executive partner at Gartner, Inc. jonathan.settle@gartner.com

Joseph Stahl, MBA ’78, Keedysville, MD, is a guide at Antietam Battlefield.

Wan Azman Wan Mamat, BSBA ’91, Kuala Lumpur, W. Persekutuan, Malaysia, is the CEO at AIA AFG Takaful Berhad. wan.azman@aia-afg.com.my

Julianne Heins, MBA ’92, Sewickley, PA, accepted a new position with Seneca Resources as the director of procurement. heinsj@srcs.com

John Howell, MBA ’92, St. Louis, was promoted to VP marketing at Enterprise Holdings, Inc. john.m.howell@ehi.com

Corey Rosemond, BSBA ’92, Plano, TX, is the business development director of Plantronics. corey@alum.wustl.edu

Rob Schwartz, BSBA ’92/ MBA ’93, St. Louis, was recognized as #2 in sales and customer satisfaction by AT&T Mobility’s vice president of the Greater Midwest Region at the first quarter Reach for the Top awards ceremony. Rob also was ranked #12 of more than 20,000 AT&T Mobility sales reps in the nation. Contact@RobSchultz.com

Seth Diamond, BSBA ’93, New Milford, NJ, is a realtor with Coldwell Banker Residential Brokerage. sethd155@optonline.net

Marc Maun, MBA ’82

Marc Maun is CEO of Bank of Kansas City, a division of BOK Financial, a $26 billion financial services company. Prior to his role with Bank of Kansas City, Maun served another BOK Financial division, Bank of Oklahoma, for 21 years.

Maun currently serves on the Nelson-Atkins Business Council, Greater Kansas City YMCA, and Kansas City Sports Commission board of directors. He is a member of the Johnson County Business Leadership Council and Economic Advisory Board for Greater Kansas City.
Theatrical producer Terry Schnuck has a knack for picking winners on Broadway. The Gershwins’ *Porgy and Bess* won this year’s Tony for best musical revival and *Clybourne Park* won best play—both backed by Schnuck. Last year’s revival of *Hair* and the 2006 debut of *Spring Awakening* also earned Tonys for the veteran producer.

“If it does not hit me emotionally in some way then I am usually not interested,” explains Schnuck on what makes a play a good investment.

“The exception might be a piece that I believe has some commercial potential and there is someone connected with the piece that I especially want to work with, be it a lead producer, director, actor/star, etc. Musicals, in particular, are tricky as you may love the musical score, but if it doesn’t have a good book or story the show is not going to be a success.”

Schnuck says being the lead producer on a play or musical is like starting up a new business. “You have to have a plan to sell, you have to raise the capital to pay for the production, you have to assemble a team to help you market and sell the product, you have to understand financials, you have to be good at investor relations, you have to have a plan, and you have to be able to collaborate and work with a team, among other things.” And he credits his Olin education with playing an influential role in each production.

---

**Terry Schnuck, PMBA ’80**

Elaine Leo, BSBA ’94/MHA ’96, Harrogate, TN, graduated from medical school in 2012 and will pursue a residency in neurology after completing medical mission work with Africa Inland Missions in Uganda. memphisjeepper@yahoo.com

Rita (Thurmon) Moore, MBA ’94, Montgomery, IL, is a global parts supply manager for Navistar, responsible for parts purchasing for Navistar’s global business unit. ritamoorermba@gmail.com

Barbara Pacheco, BSBA ’81, MBA ’82
“It’s an exciting time to be a central banker,” Barb Pacheco told American Banker in a recent article about her role at the Federal Reserve Bank of Kansas City, where she is a senior vice president and head of the Financial Services Division. Pacheco’s specialty for the past decade has been the payments industry, from ATMs and debit cards to today’s quickly evolving mobile services such as PayPal, Dwolla, and Chirpify.

Pacheco is an active volunteer with the INROADS organization, serving on the board of directors of INROADS Midwest Region, its Kansas City advisory board, and its national board of directors. INROADS’ mission is to develop and place talented underserved youth in business and industry, and prepare them for corporate and community leadership. Pacheco continues to serve on the Board of Examiners for the Excellence in Missouri Foundation, the sponsor for the Missouri Quality Award.

Sharon Wang, BSBA '08, San Diego, CA, graduated from the University of San Diego School of Law, May 2012.

Yuriy Yuzifovich, MBA ’00

Yuriy Yuzifovich came to Olin as a “Moscow Fellow,” a federal program that enables young Russians to obtain a U.S. education, but requires them to return to Russia for several years after graduation. Before he left St. Louis in 2000, Yuzifovich co-founded a custom software development company, Mercury Development, with another Wash U student and developed several applications aimed at portfolio strategies and forecasting fixed-income instruments at NISA Investment Advisors. Yuzifovich was determined to maintain his U.S. connections and come back, often.

These days, Yuzifovich and co-founder Josh Greenman, A&S ’96, have offices in Russia, Miami, Atlanta, and Cleveland. Their client roster includes Dow, HP, SAP, Symantec, and HSBC, among others. They create custom apps and software solutions for multiple platforms with a team of more than 100 employees.

This summer, Yuzifovich brought his son to St. Louis to attend computer camp at Washington University. Yuzifovich is looking forward to connecting with other alumni in the tech field via the new IT subgroup for Olin alumni on LinkedIn.
Jeff Platt, BSBA ’06

“Everyone loves being free from earth’s gravity,” says Jeff Platt, CEO of Sky Zone, an indoor trampoline park franchiser. “Kids can feel like a superhero when they come to Sky Zone, and parents love the fitness aspect related to jumping on trampolines. It is an activity that the whole family can do together.” Platt’s startup has grown to 20 franchises currently operating nationwide with another 56 in the works.

Platt says his Introduction to Entrepreneurship class at Olin was the best thing he could have done, but adds there is nothing like real-world experience. His advice for aspiring entrepreneurs? “Find a mentor. Always bounce ideas off of them. It will be your greatest resource.”

Bahl joined the Coast Guard, became a cadet in the U.S. Coast Guard Academy, and joined the Amphibious Corps, where he rose to the rank of lieutenant commander. His travel adventures began in the South Pacific aboard a Landing Strip Tank, delivering troops and materials to the Pacific Islands.

In 1946, Mel and Sue were reunited in St. Louis. Bahle began a 37-year career at Ralston Purina, where his long association with the Danforth family began. He served as assistant to every one of Ralston’s board chairs until his retirement.

An astute financial advisor, Bahle shared his talents with numerous organizations, including the Danforth Foundation, Lutheran Family and Children Services, and the American Youth Foundation.

Mel and Sue became bona fide members of the Washington University family, with an enduring interest in the university’s progress. They were among the first sponsors of the Scholars in Business scholarship program at Olin. Their steadfast support and their deep desire to help students achieve an education at Washington University provide a legacy to this community and an impact on generations to come.

Melvin C. Bahle is survived by his wife Sue Bahle and a niece, Melanie Hepperly.

In Memoriam (continued)
On October 6, Chancellor Mark Wrighton announced a multi-year effort to secure a minimum investment of $2.2 billion for Washington University. Each school has identified areas where we can build on the strong momentum of recent years, maintain our levels of excellence, and continue to make significant contributions to society.

Olin Campaign Goals

Olin’s focus is on attracting talented and deserving students, attracting and retaining outstanding faculty, supporting and improving our programs, and offering an outstanding environment for learning.

Business education has never been more valued—and vital—than now. Our regional and national economies depend on creative individuals and innovative companies that can compete globally, respond quickly to challenges and opportunities, and reinvent themselves to remain dominant in the ever-changing world of the marketplace. A strong business sector creates opportunities, raises living standards, and serves as the primary engine for economic growth, fueling local, national, and international economies.

We produce a steady stream of groundbreaking ideas and people who know how to use them. Our students understand that leadership goes beyond the bottom line. They graduate as ethical leaders, bold innovators, and critical thinkers, and they innovate to improve living standards here and afar.

To achieve our goals—and to strengthen the education we offer—we are launching our $210 million campaign. We proudly join with a larger effort, Leading Together, The Campaign for Washington University, to make the world a better place.

To speak directly to a member of the Alumni & Development staff about how you can participate in this effort, please contact Nancy Barter at 314-935-9033.
