

DESCRIPTION

As many organizations invest in improving their operations, Supply Chain Management & Consulting has been a hotbed of activity—with growing demand for graduates with the right mix of analytical skills, information technology understanding and supply chain management knowledge. In this platform, you'll gain state-of-the-art knowledge, industry language and skill sets necessary for a variety of careers such as product or process manager, consulting engagement manager, project or program manager and many other positions across diverse production and service industries. Many students, either in combination with the Strategy Consulting Concentration or as a standalone undertaking, find the pursuit of this platform appealing
