

WashU DBA

Master research and analysis skills that will help you guide your organization to success in today's unpredictable business environment.

Washington University's Doctor of Business Administration (DBA) provides you with industry-relevant, applied research experience. Our graduates pursue careers in corporate settings, consulting firms, or in government agencies where advanced research skills in analyzing business challenges lead to greater insights and success.

This advanced Doctor of Business Administration (DBA) in Finance graduate program crosses traditional boundaries and provides you the opportunity—**under the guidance of Washington University faculty**—for structured coursework and focused, independent, scholarly reading and research on important issues relating to business.

“A DBA in Finance from Olin will take my career to the next level. The learning I have had and will continue to experience at Olin will allow me to fulfill all short-term and long-term goals, and approach them with more acuity and confidence.”

Danielle McPherson, DBA '15

5 to 6 years for part-time students

“This invaluable experience has provided me with a comprehensive foundation in finance and has given me the tools to successfully pursue my personal goals.”

Francisco Marcet, DBA '14 ►

Olin’s DBA is a practitioner’s doctoral degree designed to meet the needs of a researching professional, rather than a professional researcher.

While a PhD is intended for people who want a research career in academia, the DBA is extended graduate study beyond a master’s degree and is focused on practical application. DBA students typically have careers in [corporations](#), [consulting firms](#), and [government agencies](#) where advanced research skills in analyzing business problems are required.

With Olin’s DBA program, you will develop applied research capabilities with more immediate, [real-world applicability](#) than the type of research pursued in a PhD program. And unlike the PhD program, the DBA program is designed for people who may [continue working during their matriculation](#).
