“The success of our marketing PhD program comes from its size and top-notch faculty. The small size ensures that each student gets individual attention throughout the program, while the premier Olin faculty allow students to apply the newest techniques to projects that match their interests.”

— Raphael Thomadsen, Associate Professor of Marketing

At Olin, the Marketing discipline is distinguished by a demand for innovative ideas, critical thinking, and a strong emphasis on quantitative abilities. The program has two areas of study: Marketing Science and Consumer Behavior.

Marketing Science focuses on economic fundamentals, including microeconomic theory and econometrics. Using this methodology, you’ll examine mathematical modeling of buyer/seller interactions, consumer choices, purchase behavior, resource allocation, components of the marketing mix, and new-product development.

As a Consumer Behavior student, you’ll concentrate on psychology fundamentals, including cognitive psychology, social psychology, and behavioral decision theory. These areas provide a strong foundation for you to study and research consumer judgment and decision making, cognition, culture, emotions, motivation, individual differences, perception, and social influence.

Some PhD Marketing students analyze the intersection of Marketing Science and Consumer Behavior, exploring how the interplay of these two broad areas can improve understanding and predict marketing phenomena.
